

## Making a Bowl – By John Hepworth

### Step 1:

Spalted beech blank mounted on a 150mm diameter faceplate

### Step 2:

A recess is formed for a scroll chuck to be fitted

### Step 3:

The outside shape is completed

### Step 4:

The outside has been sanded, sealed and a friction polish applied with a final coat of wax

## Making a Bowl – By John Hepworth

### Step 5:

The blank is now mounted on the scroll chuck ready for internal turning

### Step 6:

The inside is sanded and requires final polishing and waxing

### Step 7:

The completed bowl
